Outline

- Task
- How To Segment Guide
- Developer Documentation Requirements
- Discussion

Task

- DII COE Reserved Words
 - Examine need to update the directory structure used to deliver segment software to the DISA CM office.
 - Examine if the current structure needs to be changed to accommodate the Microsoft Logo Program.

How To Segment Guide

- **Submitting Segments for Integration and Testing**
- Segments are formally delivered to either the DISA (DCTF) or the Operational Support Facility (OSF).
- GCCS mission application segments are delivered to the DCTF.
- GCCS mission application segments and DII COE component segments are delivered to the OSF.
 - Each facility has a set of documentation that defines the delivery requirements and procedures for submitting segments. There are documentation and support requirements that need to be identified. Contact representatives of these facilities for details on how to obtain the documents.
 - MakeInstall versions of segmented applications are submitted for all Windows NT segments.

Developer Documentation Requirements, Version 2.0

- Establish the requirements for the type, content, and format of all documentation required by contract, or other binding agreement, to be submitted with the delivery of DII COE software.
- Guidance for the documentation requirements for all DII COE software developers.

Discussion

- Each agency has different requirements
- Deliverable environments
 - Developers configuration
 - Segmented
 - Install / Setup
 - Deinstall / Uninstall
 - User Environment
- Directory structure
- Request each lab brief NTAG on its Windows software submission requirements
